Co-operative Party Experience

Attending online and in-person meetings, understanding the role or improving solutions to have a common success.

Assessing how accessible it is for most interested people and other activities in general such as planning or what needs to be added to the community.

Respect for the community a model that is seen from many people in the party.

Co-operative Movement Experience

The program is very well completed, sometimes you can't add anything extra, but being from the first days I can see how the perspective has evolved in recent years, with real leaders, speakers and many others.

I want to allow myself to contribute with other development projects and reasonable planning in the coming months.

Governance Experience

Every leader has something to show, but by continuing on the same program we will see how we are all in the first place.

So the plan that we would like to improve is that we understand and we need housing for every family in the United Kingdom in the next 20 years.

Election Statement

I am interested in continuing the evolution of the movement in the United Kingdom.

To contribute to what can be accessible so that we can have many members.

I develop all the projects in the movement myself, and together with party collaborators.
